COMPLETE CABLE MANAGEMENT SOLUTIONS

Coulstock & Place delivers reliable, precision engineered cable solutions tailored to your exact requirements.

With decades of experience across a wide range of industries, we combine technical expertise, flexible manufacturing and rigorous quality control to provide dependable solutions, from single terminated cables to complete pre-wired assemblies.

Flexible Production, Built Around You

Whatever the size or complexity of your project, our combination of automated and manual processing enables us to deliver:

- One-off prototypes and small batches
- Scheduled high volume production
- Bespoke builds to your specification
- Specialist cable printing and identification
- Custom cable processing
- Fast, flexible turnaround

CABLE HARNESS DESIGN & MANUFACTURE

Our comprehensive project management service supports your cable harness from initial concept and design through to final assembly and delivery. Every harness is manufactured with full traceability and consistent quality in accordance with strict UL accredited standards. **We produce rugged, reliable harnesses for demanding applications, including environments exposed to:**

- Moisture, dust and contamination
- Shock and vibration
- Other hazardous operating conditions
- Aggressive chemicals

The result is a robust, compliant solution engineered for dependable performance.

COMPLETE CABLE MANAGEMENT SOLUTIONS

COMPLETE PRE-WIRED ASSEMBLIES

From a simple single-terminal cable to a fully pre-wired electrical assembly, we can manage every stage of your project. **Our tailored service can include:**

- Specification review
- Material sourcing
- Cable preparation
- Complete electrical assembly
- Quality assurance and testing
- Final delivery

Every requirement is individually reviewed to identify the most efficient and cost effective solution.

Our experienced team delivers high quality workmanship, responsive support and the flexibility to meet precise technical and commercial needs.

PRECISION LEAD PREPARATION

Our lead preparation service helps electrical products meet increasingly demanding national and international standards. **We Process:**

- Shock and vibration
- Aggressive chemicals
- Moisture, dust and contamination
- Other hazardous operating conditions

Cables can be supplied cut to length, stripped, terminated or tinned, with cable identification markers and terminal insulators fitted as required.

For heavy duty applications, we offer a wide selection of robust crimp lugs and ferrules designed to perform in harsh environments.

From Design To Delivery

Choose Coulstock & Place for:

- End-to-end project support
- Bespoke manufacturing expertise
- Flexible production volumes
- Full product traceability
- Reliable, standards compliant quality
- Solutions built for demanding applications

Talk to our team about your next cable management project and discover a solution designed, manufactured and delivered around your needs.
